## (54) INPUT DEVICE FOR AUTOMOBILE

### (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide an input device for automobile which can reduce the error operation in the automobile operating condition, can improve the workability and the safety, and can improve the future expanding property.

**SOLUTION:** A touch panel display provided with a display 4, and a touch panel 5 on whose surface an image displayed on the picture surface of the display 4 is permeated and shown; and plural switches to convert the ON condition and the OFF condition of a device installed to the automobile by operating a specific operation on the touch panel 5; are provided. On the display 4, the first precise image screen to display the switches to control one sort of electric article by the switch group; the second precise image screen to display the sorts of electric articles which can be controlled by either switch; and a large item image screen to display the position of the switch which can control one sort of electric article, and the positions of the operation condition display switches to display the operation conditions of the above devices; are displayed.
